DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - A. Claims 1-7 and 10-14, drawn to an exposure apparatus and absorption/blocking member, classified in class 355.
 - B. Claims 8-9, drawn to a holder, classified in class 269.
2. Inventions A and B are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the exposure apparatus can use a different object stage configuration for holding the object during processing. The subcombination has separate utility such as for displaying a craftwork that requires isolation from the surrounding elements.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
